**Project Overview**  
The Events Center project consists of the construction of a 43,750 square foot pre-engineered metal building on the Gaylord Opryland property. The 40,000 square foot clear-span event space is divided by a 34-foot tall removable, insulated wall panel system capable of maintaining below-freezing temperatures for Opryland's annual *ICE!* exhibit. There are five restrooms, office space, and a six-window ticket booth located in the front portion of the structure. The final layout allows for unlimited uses of the facility.
